PROFILE

Hi. I am a beginner frontend developer. I really enjoy web development, and now I'm looking for a company where I can realize myself in this path, increase my knowledge and become a really cool developer
I applied and consolidated the skills received during the training when creating my pet projects. You can see my pet projects on Github. I also have my own portfolio site with a list of projects received from the github API

WORK EXPERIENCE

Front-end developer 2022 - ...

Perhaps your company name will be here

At the moment I have no commercial development experience. But as part of my training, I completed pet projects.

I would very much like to start my commercial experience in web development and programming in your company

Deputy chief designer 2019 - fb 2022

Kharkiv lifting & transportation equipment plant

Design of bridge load-lifting cranes. Conducting technical negotiations and consultations. Organization of work and interaction design department. Control over the fulfillment of assigned tasks.
